LIGHTING

GLOBEN LIGHTING 2020/2021

To search for answers and inspiration in nature is something human beings have done for ages, and these times are not different. We want to bring elements from nature inside, and organic shapes and materials have never been so in vogue before.

We introduce our AW20 collection, a collection that balances both contemporary designs with eye-catching statement pieces, and we let materials such as marble, recycled paper, wood, textile, and glass be a part of our homes. Look for the news tag in the catalogue and you will easily find this brand new collection.

For this versatile collection, we went both to our surroundings for inspiration as well as the Swedish turn of the century. A playful and unexpected mix where the main focuses are organic shapes, pleated surfaces, and natural materials.

Our ambition is to work with even more sustainable materials, and therefore we expand our product range with more products in unbleached recycled paper. The color scheme remains sober and earthy and goes well with the materials that are trendy right now.

Welcome back, nature!

BALI *in natural colored rattan*

JUNI *with cut clear glass*

WE ARE GLOBEN LIGHTING

Globen Lighting design, manufacture and sell interior lighting for both private and public environments. Our head office is located in Svenljunga, near Gothenburg, Sweden and through our dealers we export lighting to most parts of Europe and many other parts of the world. Globen Lighting is today one of the largest players in Sweden within the lighting industry.

The beginning

The year is 1972 and the place is Gothenburg. Anders Hall's entrance into the lighting industry was in fact somewhat of an accidental occurrence. Anders, who at this time produced paper plates, had an uncle who produced plastic cheese-dish covers. In August the same year the previously mentioned uncle had received a fairly large order of 5000 plastic covers from a customer in Southern Sweden. But as an unexpected turn, the customer went bankrupt when production was completed.

What to do with 5000 cheese-dish covers?

Anders was commissioned to solve the problem. He drilled a 42 mm hole on the top of the cheese-dish covers, glued a fringe band at the bottom and mounted a lighting suspension. A ceiling lamp was born - Stina. The lamp later came to be complemented with a table lamp consisting of two composite cheese-dish covers on a base - Bullen, which today most often appears in second hand stores and retro magazines. The production and product range later came to be expanded and the passion for lighting was born.

A new beginning

In 1983, Globen Lighting (first Globen AB) was founded by Anders together with his wife Anne Charlotte. They settled down in Svenljunga, where the headquarters still today is located.

The present time

Many years have passed by since then and today Globen Lighting is one of the lighting industry's major players and our wide range is exported all over the world. Although we are a growing company, we try to remain the personal and close feeling, both internally in the house between us colleagues as well as externally with our customers. The personal meeting and service are important to us and it is something we also are known for; "At Globen Lighting you are always welcome and taken care of", which we are proud of.

Our own design

We design almost all our products in-house at our headquarters in Svenljunga. In addition, we cooperate with some selected external designers. The foundation of our design is based on a modern and creative design. Production takes place in our own factory in China, which makes us both flexible and competitive. Globen Lighting has been on the market for almost 40 years and we are more creative than ever. Over the next 40 years, we promise to continue to be innovative, to preserve uniqueness and to combine design, functionality and feeling.

OUR PRODUCT DEVELOPMENT & PRODUCT RANGE

Swedish Design

We design almost all of our lamps in-house at our headquarters in Svenljunga, with five own designers. In addition, we also cooperate with a number of external established designers who speak the same design language as we do. All of our designers have their own style which contributes to a wide product range where there is something for many tastes and interior styles.

In-House Creative Studio

Mostly, our in-house designers design their own lamps, but sometimes we also get ideas that we bring to life together. That's why we call us GL Design Studio, our own creative design team including our in-house designers and our Purchase Manager.

Product Focus & Product Range

When working on our product range we focus on two different areas. First, we have lamps that will fit in each

people's home and second we have lamps that will go into the public area. Most of our products although fit into both these focus areas.

During the last year we've focused a little extra on areas such as IP44 classified products for bathroom and outdoor, functional lighting and we've also emphasized to produce even more lighting in materials such as stone, wood and recycled paper to provide trendy nature lamps.

Some lamp series have been further developed during this year. You will now find the lamp Torrano in solid marble as a floor lamp and the Tropez series with its recycled paper is now available as a wall lamp just to mention a few of our new friends in our product range.

Are you curious to know more about our products and designers please go visit www.globenlighting.com.

OUR DESIGNERS

Alexander Meyenberg Hall

Alexander Patrick Meyenberg Hall's (Patrick Hall) core idea with his design is innovative thinking with a focus on graceful simplicity. Alexander's design has been represented in the Nordiska Museet in Stockholm with our popular lamp Diamond, one of the most announced and successful lamp series during the recent years.

Anna Landerholm

Design is a big passion for Anna and she enjoys finding inspiration from older days, often through architecture, ornamentation and scenography in old movies. The straight lines from Art Deco, symmetry and geometric shapes are attributes you can find in her Astoria series she has designed for Globen Lighting.

GL Design Studio

Globen Lighting's own design team Design Studio's main focus is to create lighting that are liked by many, we try to fit in each people's home. We are also very interested in trends and materials which we try to apply in product development and design.

Malin Lundmark

Malin designs functional products with a poetic and playful approach where the everyday life often is a big source of inspiration. In her creations she mixes fantasy and playfulness with technical solutions that together create unexpected experiences in her products.

Mimmi T. Silesius

Mimmi is a multi-faceted designer with a background in art, glass and design. Mimmi is i.a. educated at Kosta Glasskola and is one of the designers behind the design duo Omaka Design. Her design is based on an organic, round and soft design language, which is also reflected in the lamp series Nog for Globen Lighting.

WIS Design

WIS Design is a Swedish design duo consisting of Lisa Widén and Anna Wallin Irinachos. Their design is often characterized by a poetic and playful expression, where function and decoration work together to make that "little extra" to all the objects that surround us in our everyday lives.

Anne Charlotte Hall

Anne Charlotte Anna Hall (Anna Andersson) is together with her husband Anders the founder of Globen Lighting. Anne Charlotte has designed lamps since the 70's and playfulness and creativity are often in focus when she designs new lamps.

Erika Norén

Erika has a great eye for color, shape and design, and with her creative skills she creates with both her hands and with digital tools. Erika's design is based on simplicity and contemporary trends with influences from the shapes and colors of nature and different parts of the world.

Joakim Thedin

Joakim's design focuses on innovative smart solutions and is often based on the sculptural form of the lamp. The sarasota series, which is his first lamp in collaboration with Globen Lighting. The idea with Sarasota was to create a lamp with a classic look but still with a modern shape. A bit of a tribute to the light.

Mikael Holvik

Mikael calls himself "a creative monkey", which is also reflected in his design. It is playful, innovative and likeable to many. He has an eye for details and leaves nothing to chance, when he gets a vision he makes sure that the end result will be just right.

Roger Persson

Roger is an industrial designer living in Gothenburg. Since 2009, he runs his own design studio Roger Persson Design, where he mainly designs furniture and lighting. Roger's design is based on simplicity, clarity and a timeless expression which you can view in his first lamp series for Globen Lighting which is called DOT.

CONTRACTS

We design, manufacture and sell interior lighting for private interior as well as contract projects. Are you e.g. an interior architect or a stylist we are able to help you to get the perfect lighting for your project.

What can we offer?

We take full responsibility of the lighting fixtures in your project, independent of material or type. Beside this, we can offer high quality lighting with flexible deliveries, different transport options and we have full EU certifications. The production takes place in our own factory, which makes us both very flexible and competitive. We have three main concepts that we can help you with:

| Standardized products

| Modified products

| Customized products

Examples of environments we deliver to are hotels, restaurants, offices, lighting for entire store concepts, hospitals, libraries and many more.

For references go visit www.globenlighting.com

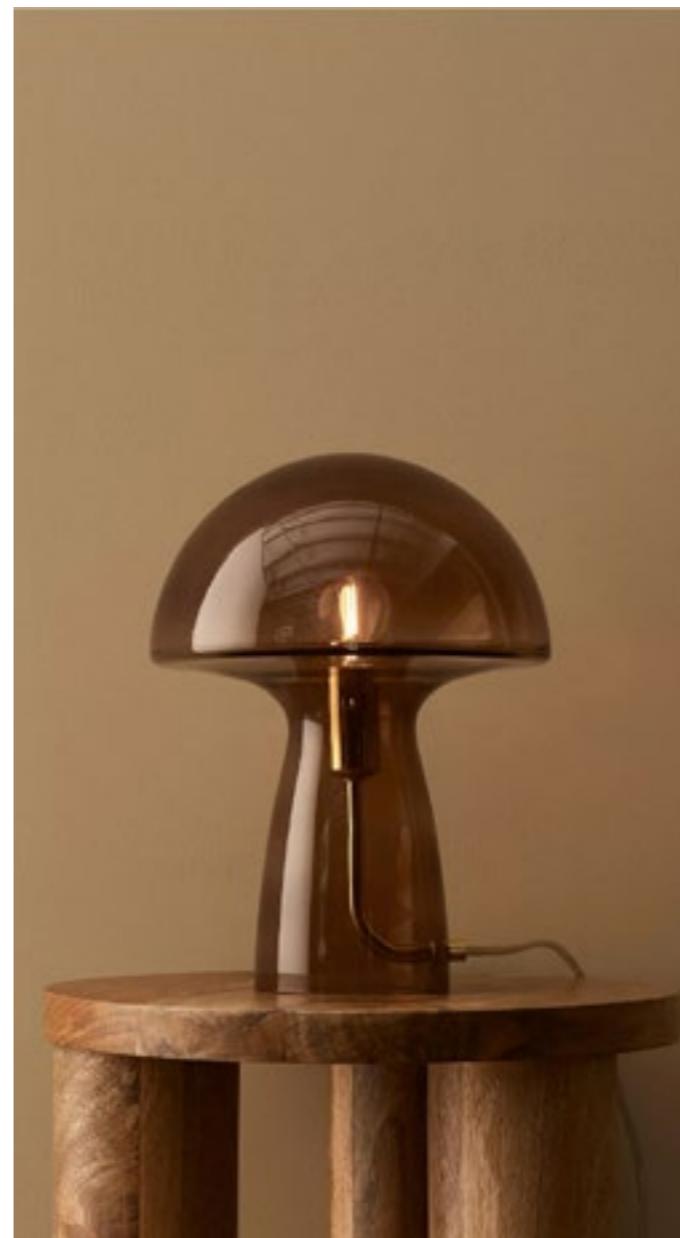

Restaurant Lily Lee, Finland

The wall lamp Ester in this project by Franz Design. Photo by Suvi Laine. www.lilylee.fi

STANDARDIZED

We offer you our existing product range which is based on a creative, mood changing and unique feeling. The vast majority of these products are designed in house at our Head office and stocked in our warehouse in Southern Sweden for single-piece. These usually are for immediate dispatch for smaller quantities up to 50 pcs and for larger quantities 2-3 months unless we hold them on stock.

Ellos, Borås

Custom made version of our table lamp Fungo 22.

MODIFIED

You are able to personalize our standard products already at low volumes to completely fit your specific project. These changes could suggest e.g. changes in color, size or cable length. Moreover, it can also imply larger contractual changes, e.g. added reading arm, built in USB-port, added light sources, or other preferred features. Delivery time for modified products is roughly 2-3 months.

Hotel Chalet Wapiti, France

Chandelier and project made by SCI 489 Les Pecles.

CUSTOMIZED

We are able to provide fully customized lighting fixtures according to your detailed design- and technical needs. Our talented in house designers are ready to assist you, or you provide your own ideas and sketches, which we realize and create uniqueness for each project. We produce all types of material in our factory so you're not bound to any specific construction or material. Delivery time roughly 3-4 months.

TROPEZ makes us think of the Mediterranean and the French Riviera, partly due to its material and partly to its shape reminding of a big beautiful floppy sun hat. Tropez is made of Papier-maché, French for chewed paper, ie paper and glue. The paper is recycled and unbleached.

OSAKA is a strict graphic floor rice lamp.
The lamp is made of white rice paper and has a
decorative handle in matt black lacquered metal
and a matching base as the shade stands on.

1xE27 | Max 60W | Rec. L143

KYOTO With inspiration from Asia and the traditional rice lamp, Kyoto, a rice lamp with a modern expression, was created. The designer Mikael wanted to create a modern variant of the rice paper lamp and found the beautiful shape in a spinning toy from his childhood, the perfect combination of form and material. The thin white rice paper creates a soft light and at the bottom a black decorative metal stick hangs with a little weight in it.

TORRANO in solid marble is a luxurious interior detail for the home. The round shape contrasts in an interesting way to the raw stone.

ANGOLO is a stylish and functional corner wall lamp. The designer Joakim wanted to create a lamp where the starting point was to use all the surfaces and corners in the home. Just the corner is an area that is rarely used and above all there was no corner lighting, there and then the corner wall lamp Angolo was created. Most beautiful with a decorative plant on it.

LUDO

Mikael Holvik

Metal/Glass | W 18 D 31 H 156 | 1 pcs
1xGU10 + 1xG9 | Max 35/15W | Rec. L119 + L54

LUDO with its characteristic shape is reminiscent of game pieces in a famous board game, which in Norwegian is called Ludo. The lamp has two lamp holders, a G9 in the white glass globe and a GU10 in the metal screen, each light source to be lightened separately with switches on the lamp base.

UNDERCOVER series is inspired by the turn of the century and plays with the light in an exciting way. The lamp holder is recessed into the holder to hide the light source and create a directed light. The rounded lamp shade has an underside in brushed brass to beautifully reflect the light. The lamp shade can be angled in different directions depending on which direction you want to reflect the light.

UNDERCOVER hangs on a fixed metal stick from the ceiling. The stick is divided into two, 40 cm and 60 cm, which allows the lamp to be hung with three different height options. Minimum height 65 cm, next 105 cm and maximum height 165 cm.

BALI 35 (SHADE)
GL Design Studio

Rattan | W 35 D 35 H 24 | 1 pcs
1xE27 ring bracket (Suspension and light source are sold separately)

BALI shades are made of natural colored rattan.
N.B! The shade can be hung outdoors, but please note
that weather and wind can naturally change the
appearance of natural materials.

KOSTER is a graphic lamp that is IP44 classified, which means that it can withstand water splashes and larger particles such as sand grains. Hence, it fits well outdoors and contributes to a magical atmosphere with the shadow play that occurs when the light source is lit and directed down to the ground. Koster also works as a pedestal and has a relief surface that is perfect for putting e.g. pots on.
